

Journal of Resources and Ecology

Journal of Resources and Ecology (English) was founded in 2010. It is an English - language academic journal co - sponsored by the Institute of Geographic Sciences and Natural Resources Research, Chinese Academy of Sciences, the Chinese Society of Natural Resources, and the Chinese Ecological Society.

Journal of Resources and Ecology focuses on the research fields of resources and ecology. Its main task is to establish an international academic exchange platform representing the overall situation of China's resources and ecology research fields, comprehensively reflect the overall level, important scientific research progress and advanced achievements of China in the fields of resources and ecology, and promote international academic exchanges and research development in this field.

Journal of Resources and Ecology has been indexed by many databases at home and abroad, mainly including China Science Citation Database (CSCD), China Science and Technology Papers Citation Database (CSTPCD), China Academic Journals Network Publishing Database (CAJD), China Science Journals Database (CSPD), China Academic Journals Comprehensive Evaluation Database, Wanfang Data Digital Periodicals, as well as overseas Scopus (the Netherlands), EV (Engineering Village Geobase) (the Netherlands), BioOne (the United States), EBSCO (the United States), Zoological Record (the United Kingdom), JST (Japan).

Journal of Resources and Ecology solicits excellent manuscript sources in the fields of resources and ecology based in China and facing the world. Scholars at home and abroad are welcomed to organize special issues on major scientific research projects and hot scientific issues in the field of resource ecology. Recently, they include: "Ecological Protection and Livelihood Improvement in Ecologically Vulnerable Region" (Guest Editors: Zhen Lin, Xu Zeng rang, Cheng Wu xue), "Ice and Snow Tourism" (Guest Editor: Tang Cheng cai), "Regional Ecological Protection and Restoration" (Guest Editor: Cheng Wei ming), "Progress and Prospect of the Conservation of Agricultural Heritage System" (Guest Editor: Min Qing wen), "Land Use and Ecological Civilization" (Guest Editor: Xie Hua lin), "Rangeland Ecosystem and Management in Tibet" (Guest Editors: Shi Pei li, Zhang Xian zhou)

Main columns:

Research papers, reviews, special reports, reports on scientific research trends and academic conferences, introductions of key scientific research projects and research institutes, book and periodical news, etc.

Key areas of focus:

1. Natural resources and sustainable development
2. Ecosystems and sustainable development
3. Typical ecosystems and their resource utilization
4. Global climate change and ecological responses
5. Ecological processes and management
6. Ecological restoration and redesign techniques
7. Ecological compensation and ecological civilization construction
8. Digital ecological network construction
9. Biodiversity protection
10. Ecotourism

International Standard Serial Number: ISSN 1674-764X

Domestic Unified Serial Number: CN 11-5885/P
